

TAKATA MAXI

Description

In this excellently designed children's car seat, children stay both safe and comfortable, even on long trips. This is ensured by the stabile casing and the exceedingly soft padding on the seat itself and the arm supports. The microfibre fabrics are toxin-free and can be cleaned easily. The seatbelt guide has an auto-lock feature, guaranteeing that the belt stays in position, while the AIRPAD safety technology protects the head. Parents may enjoy the practical one-handed operation for size adjustment and belt fastening. A well-designed product, considered down to the last detail and visually appealing.
